

Automatic analysis, data extraction, and matching to transform Accounts Payable

As a result of paper-bound, manual processes and outdated solutions, Accounts Payable often represents a source of strife for businesses. Corcentric's AI Invoice Automation solution eliminates many of the obstacles facing AP and enables organizations of various sizes and maturity levels to embrace digital transformation.

WHY AUTOMATE ACCOUNTS PAYABLE?

1. Capture data and process documents more quickly than ever
2. Classify your data more easily and securely
3. Eliminate time-wasting, paper-wasting, manual processes
4. Generate insights capable of driving innovation and growth
5. Transform AP from a tactical cost center to a trusted strategic asset

CAPABILITIES:

Corcentric's AI Invoice Automation empowers organizations to generate value from previously unstructured and unmanaged data.

- + **Enhanced Data Visibility**
Customers can automatically capture data at the line-item level and validate pricing.
- + **Intelligent Data Capture**
Corcentric's AI Invoice Automation solution is equipped to validate and code invoices while ensuring compliance with all relevant regulations.
- + **Fraud Detection and Prevention**
Thanks to AI Invoice Automation, Corcentric customers detect signs of fraud, enabling a proactive approach to risk management in AP.

Transform AP with Corcentric Today

- + **Save** time thanks to automated tools for identifying errors, duplicates, and risk factors
- + **Refocus** AP's efforts on high-value initiatives

Like all of Corcentric's products, AI Invoice Automation is supported and continually optimized by an expert team. They'll work alongside you to ensure your solution is always capable of supporting your primary objectives and addressing your primary challenges.
