DID YOU KNOW?

Best-in-class organizations adopt payable automation technology at a 20-70% higher rate than peers.

Streamline workflows to reduce invoice processing costs by up to 80%.

Capture and convert paper to electronic invoices.

Still getting paper invoices? Our scanning and OCR technology extracts accurate, standardized information from paper invoices, turning them into truly electronic invoices for easy reporting.

Maximize the benefits of your existing PO process or implement a new one.

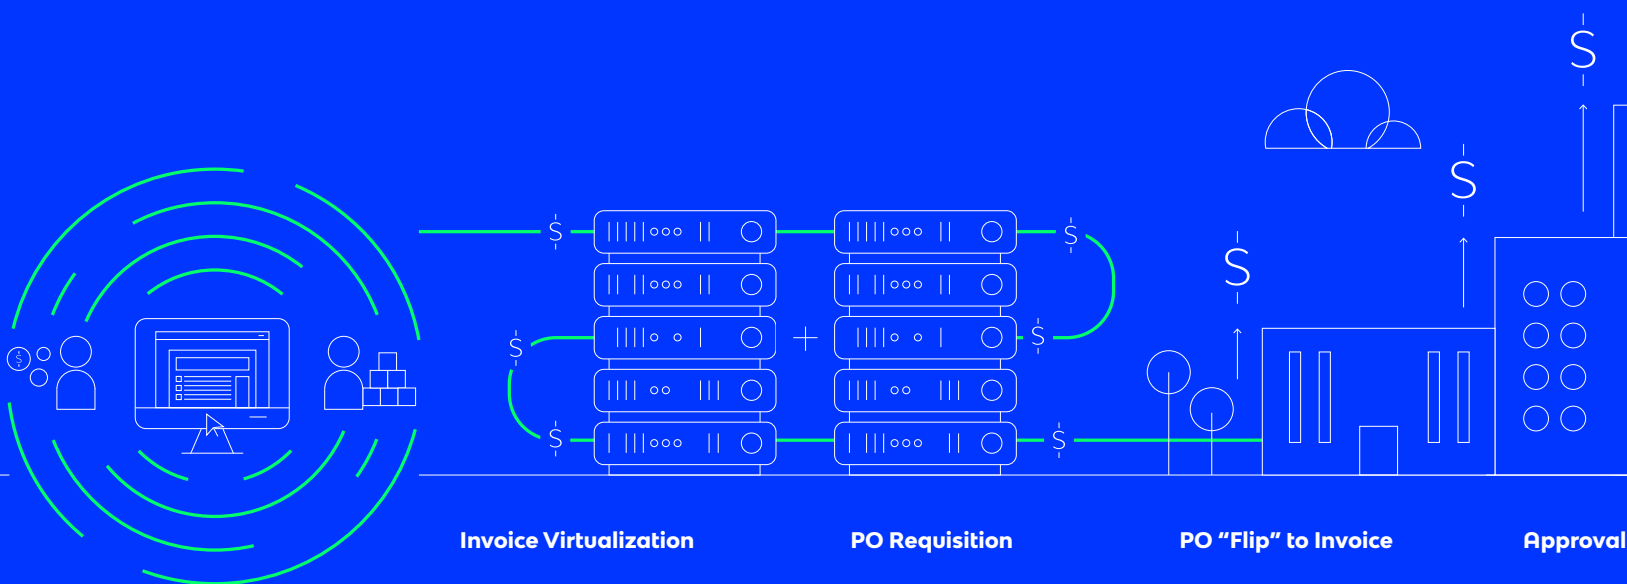

Corcentric integrates directly with your ERP, enabling you to use your existing PO requisition and approval process to transmit POs to suppliers—no more downloading and emailing.

Allow suppliers to convert POs to accurate e-invoices instantly.

Our solution provides an online supplier portal, letting suppliers access POs and convert them to accurate electronic invoices.

Accelerate three-way matching to reduce costs, increase efficiency, and ensure accuracy.

PO or non-PO, EDI or by mail, our three-way matching capabilities enable truly touchless invoicing. Matched invoices are sent straight through to your ERP with no manual intervention.

Automate the approval and escalation process to eliminate delays.

Configurable routing based on your business rules enable you to move invoices through the approval process with accuracy and efficiency.

Eliminate the burden of payment disbursements.

Our integrated payment service enables you to centralize and manage 100% of your payments—whether they are check, ACH, wire, or vCard—so you can simplify the payment process and defend against fraud.

Move data easily to and from your ERP.

Deploy seamless, two-way data exchange between your ERP and Corcentric—with minimal IT involvement.

Transform your AP. Transform your business.

- **Efficient processes that lessen the burden on your accounts payable teams.**
- **Full visibility into invoices, status, payments, and cash flow.**
- **Accessible and accurate data and reports for informed decision-making.**
- **Easy-to-use, cloud-based applications that make implementation and training simple.**
